

Rotary Narayana Nethralaya brainchild of **Dr. Devi Shetty**, Chairman, has brought ophthalmic cutting edge treatment to Kolkata and has built a “center of excellence” for the benefit of all.

Rotary Narayana Nethralaya consists of **75** beds, **10** consultation rooms, **4** fully functional operation theaters with facilities to see around **400** patients and carry out **70-80** different types of complicated eye surgeries.

Through “**Swarup Community Eye Care Centre**” we routinely do community outreach programs. We would like to concentrate our efforts in the field of community eye care in eastern region where the underprivileged patients are treated free of cost

The hospital complex, built up on a sprawling 3 acres land in Sector 5, Salt Lake, Kolkata has emerged as the sole destination for the complete eye care solutions from every walk of life.

The hospital undertakes the entire spectrum of Eye Care treatment in the field of **Cataract, Glaucoma, Oculoplasty, Pediatric Ophthalmology & Retinal Surgeries**. The hospital has a team of highly qualified and experienced Ophthalmologists, who are trained in all ophthalmic sub-specialties.

An estimated 21 million people in India have cataract and 9 million are blind due to it. Although blindness due to cataract is reversible, millions remain blind due to a lack of access to eye care.

As an integral part of our activity in **Swarup Community Eye Care Centre**, our medical team, comprising of **Ophthalmologists** and **Optometrists**, conduct screening outreach camps, making eye care services accessible to the community. This programme provides curative, as well as, preventive eye care facilities to the community. Screened patients needing surgery are brought to the hospital and operated upon.
